All the accounts I've seen and heard about yesterday's fire at the St. Louis records center refer to GSA operation. Actually, it is Archives, which is part of DGA. We can conjecture only about the records lost, but it seems not unreasonable to wonder if among those military records might not be those of TheFt. Jackson Brigade, spooking, spooks, etc. With persistent efforts at arson, all, seeming, after WG, and with some of the odd WG involvements, like McCord's list preparations, there could be some kind of connection.
